

Chinee Pet Food Co., Ltd. is a subsidiary of the Chinee Group, founded in 2004. It has been focusing on the pet food industry for over 20 years and is a pioneer in China's pet food industry. It is also one of the leading enterprises in China's pet industry. The company is mainly engaged in the research and development, production, and sales of pet food, with main products including pet dog and cat staple food series, snack series, and health product series. The company always adheres to the concept of "global perspective, continuous innovation" and is committed to producing nutritious and healthy pet food that consumers need.

As a pioneer in China's pet industry, Chinee Pet Food has always focused on the pet food industry, with independent brands such as "Tianz", "Chinee", "Rensino", and "Waiko". Its product range encompasses both dog and cat items, covering more than 300 varieties of pet dry food, wet food, snacks, freeze-dried, biscuits, teeth cleaning bones, skin rolls, and other products. It is one of the longest and most comprehensive enterprises in the pet food industry in China. Our products are sold to 68 countries and regions across five continents, and our independent brands are exported to 55 countries and regions worldwide, making us one of the leaders in the global pet food industry.

Chinee Pet Food is committed to building a high-end pet food enterprise that covers product research and development, quality control, production and manufacturing, and brand operation.

### STABLE SUPPLY OF RAW MATERIALS

The main raw material for pet food is chicken. Currently, there are four listed companies in China's white feather chicken industry in Yantai, and the nearest one is only over 20 kilometers away. It has achieved a 24-hour fresh supply chain from chicken breeding, incubation, release, slaughter, pre-cooling, packaging, cold chain transportation to warehousing and processing, and pet food products.

### PAW ABOUT US

Chinese Pet Food always prioritizes research and development innovation, pet nutrition and health research, and quality safety. The company's R&D center is one of the most advanced R&D centers in the Chinese pet industry, including the New Product R&D Center, Pet Nutrition and Health Research Center, Pet Nutrition and Health Research Institute, and the highest standard testing center in the Chinese pet industry.

All of our products must undergo a long-term feeding test for up to 6 months before being launched to ensure pet acceptance and comprehensive nutrition.

The company's testing center is currently the highest standard testing center in China's pet industry, covering three major testing areas: physical and chemical laboratories, microbiology laboratories, and instrument analysis rooms. The laboratory has introduced the most advanced liquid chromatograph, Kjeldahl nitrogen analyzer and other high-end testing equipment, equipped with highly educated and high-quality testing personnel. It has been recognized by the CNAS, the China Conformity Assessment Committee, and its testing capabilities have reached the level of a national laboratory. The testing results are globally recognized.
